GIBRALTAR SERIES

TRIPODS

The Gibraltar series is functional, durable and fully reliable; these are the common denominators for the basic demands on industrial and military support systems. Conditions for use have become increasingly demanding throughout the life of our products. Heavier and more accurate instrumentation, used in hostile situations and minimizing maintenance requirements are all factors that went into the design of our tripod products.

The Gibraltar Series is purpose built for the heaviest and most sensitive payloads. These tripods sustain loads of up to 400 lb (182 kg). Thick-walled

tubing along with cast aluminum components allows years of exceptional performance. Models with the optional rack and pinion driven column have a vertical height variability of 21 in (53 cm).

KEY FEATURES

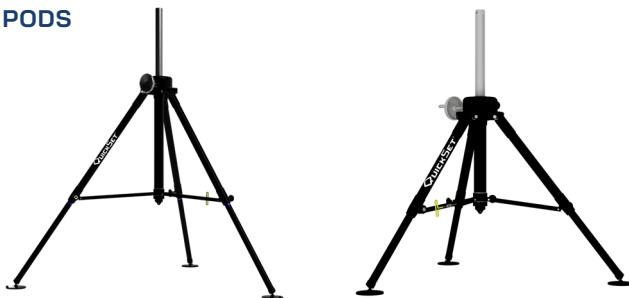

SYSTEM PERFORMANCE

- Very high payload capacity (up to 400 lb)
- Powder coated and anodized parts for resistance to harsh environments
- Exceptional torsional rigidity provides supreme payload stability
- Adapters for direct attachment of Quickset Pan and Tilts and various payloads
- Pairs with high-capacity Quickset manual Pan and Tilt heads
- Extension Mast Column Extender available
